3

GETTING STARTED

To start using your camera:

1. To charge: use the supplied USB cable to charge the camera via its USB port.
2. To switch camera on: hold the **POWER** button for one second.
3. To capture an image: **short** press of the **TRIGGER** button.
4. To capture a video: **long** press of the **TRIGGER** button.
5. To zoom in or out: press the **OPTION** button, ensure that the **Zoom** icon is highlighted in the viewfinder, and then use the **LEFT** or **RIGHT** buttons.

NOTE: If the fitted eyecup does not suit your eye shape, gently pull it away from the viewfinder to remove it, and replace with the alternative eyecup supplied.

4

OBTAIN THE MOBILE APP (Apple iOS only)

The **Scout Pro app** will help you to get the most out of your camera:

1. Stream the video from your camera to your phone / tablet.
2. View and manage your camera's files on your phone / tablet.

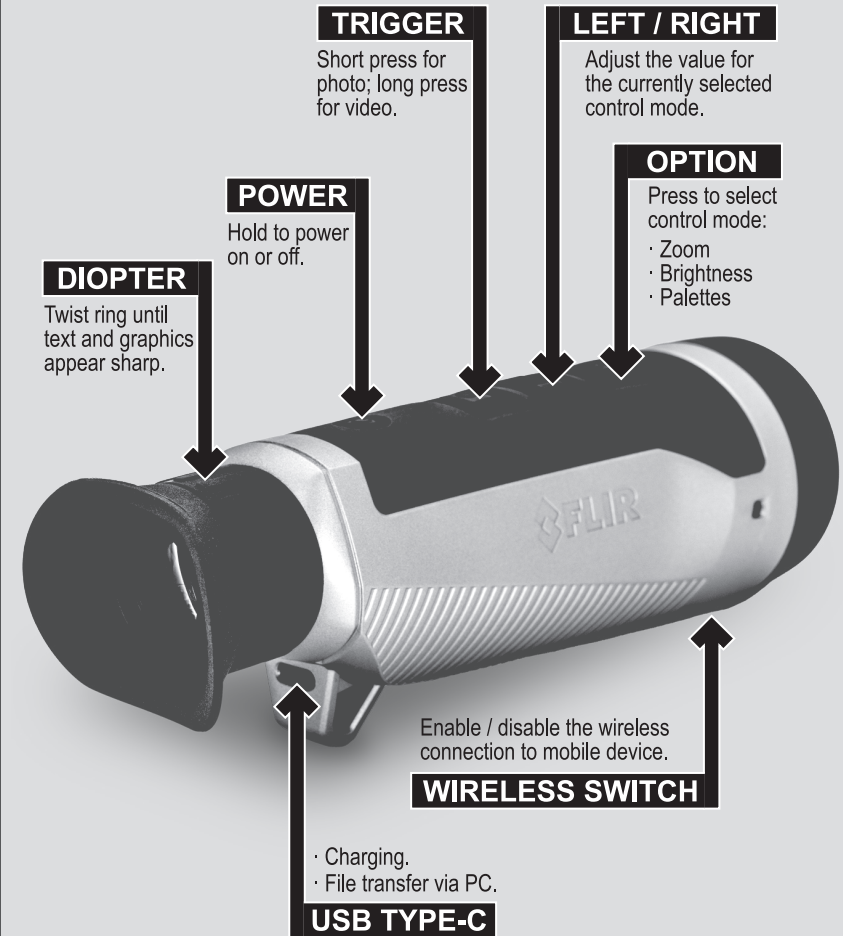

Start the app on your mobile device. Ensure that the **Wireless** switch on the underside of the camera is On. Place the camera close to your mobile device. The app will then guide you through the setup process.
